The California School Health Center Association's Youth Board is comprised of college-age youth who are committed to the enhancement and expansion of school health centers.

The Youth Board performs tasks in the areas of youth engagement, policy and advocacy, and technical assistance. The Youth Board draws its strength and creativity from its diverse membership; with members from across California, each with experience in adolescent health, school health, or youth development.

Its members support CSHC's efforts to bring the youth voice and perspectives to the table.

There is nothing more gratifying than working with people who exemplify the hope of, and our belief in, youth voice.

-- Marcia M. Zorrilla
Health Educator
Balboa Teen Center
