Steps in Setting up an SBHC

- We usually get a call from a School District.
- We meet with the school district and if we think that there could be a need and a cooperative arrangement we ask for a letter of interest.
- Salud performs a need assessment. Talk with the Department of Health. Gather information from the School district on number of children in lunch programs, number below poverty line, etc.
- We execute an MOU with the School District.
- Look for a site in the school that would support a clinic; operatories, waiting room.
- If facility is available we can offer the school a turn key operation.
- We look for grants to pay for the equipment. We can and do use our own funds. Pajaro Valley High cost of equipment was \$50,000.
- We are FQHC, therefore we are able to bill for the visit on all qualified patients.
