Putting Health Care Where Kids Are

Dollars & Cents: Public Funding to Sustain School-Based Mental Health Services

Lisa Eisenberg, Policy Director
California School-Based Health Alliance

June 21, 2018

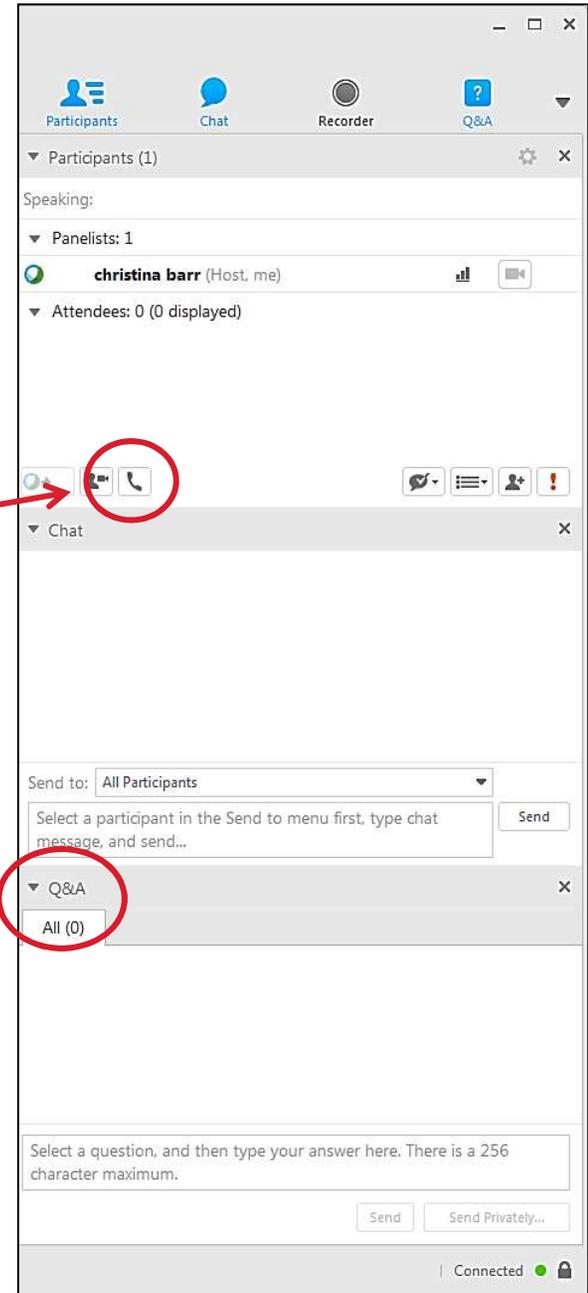

Housekeeping

Webinar will be recorded and slides will be shared

If you can't hear the audio, try changing your audio settings and call-in using your telephone

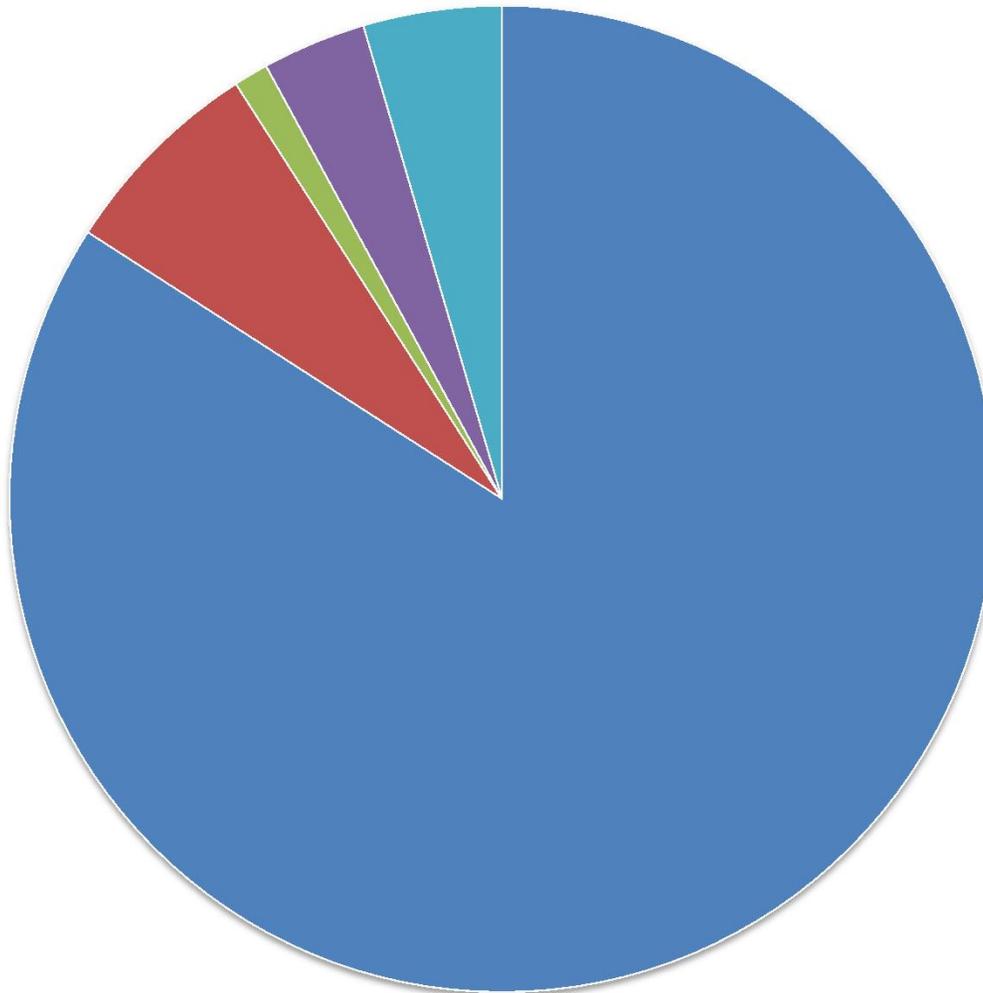

To ask questions, please use the Q&A function. I will answer questions at the end.

Objectives

1. Identify federal, state, and local funding streams that can support the full continuum of mental health services in schools.
 2. Understand major funding sources such as Medical & Mental Health Services Act (MHSA).
 3. Identify strategies for utilizing available funding streams and creating new partnerships.
- 

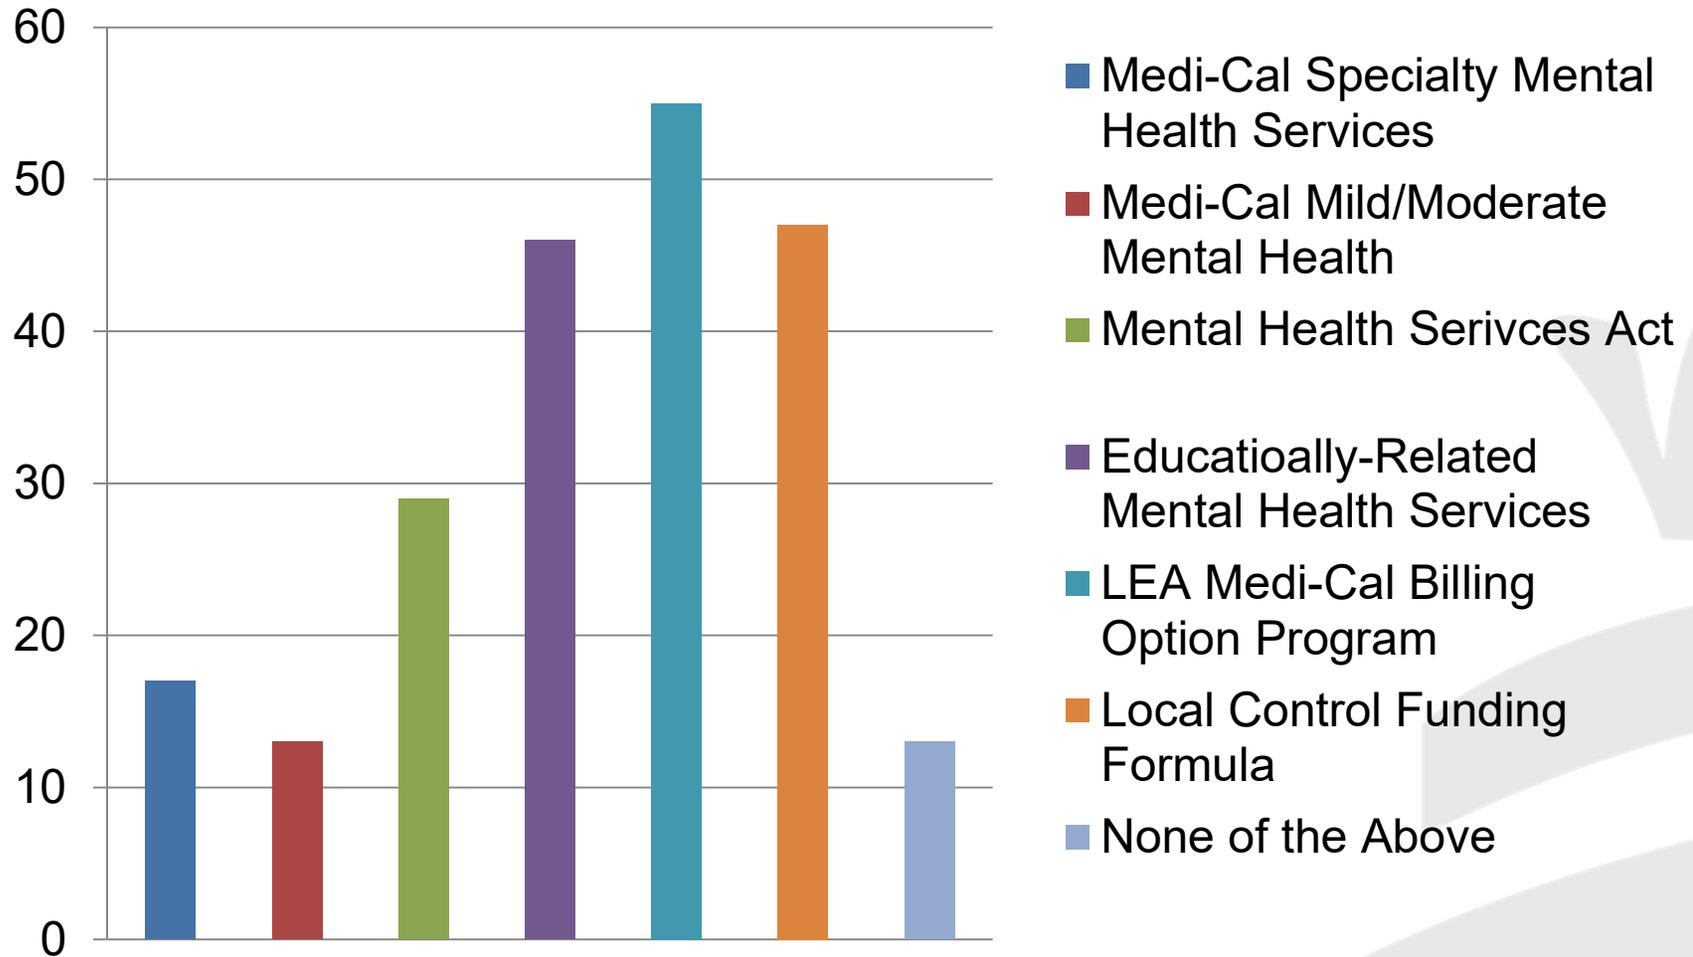

Who's here?

- LEAs & SELPAs
- Local organization or provider
- Other
- State agency
- Statewide organization

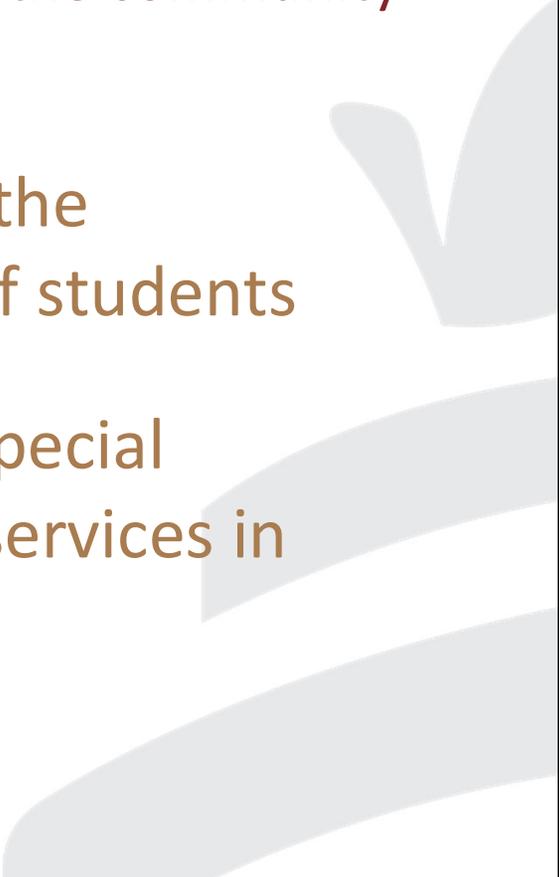

*As of Tuesday

What funding sources are you familiar with?

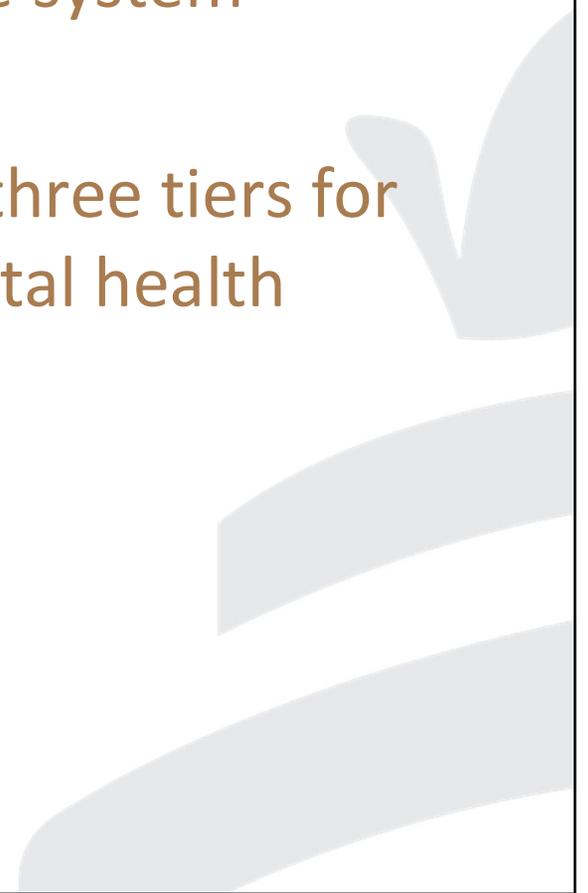

**As of Tuesday

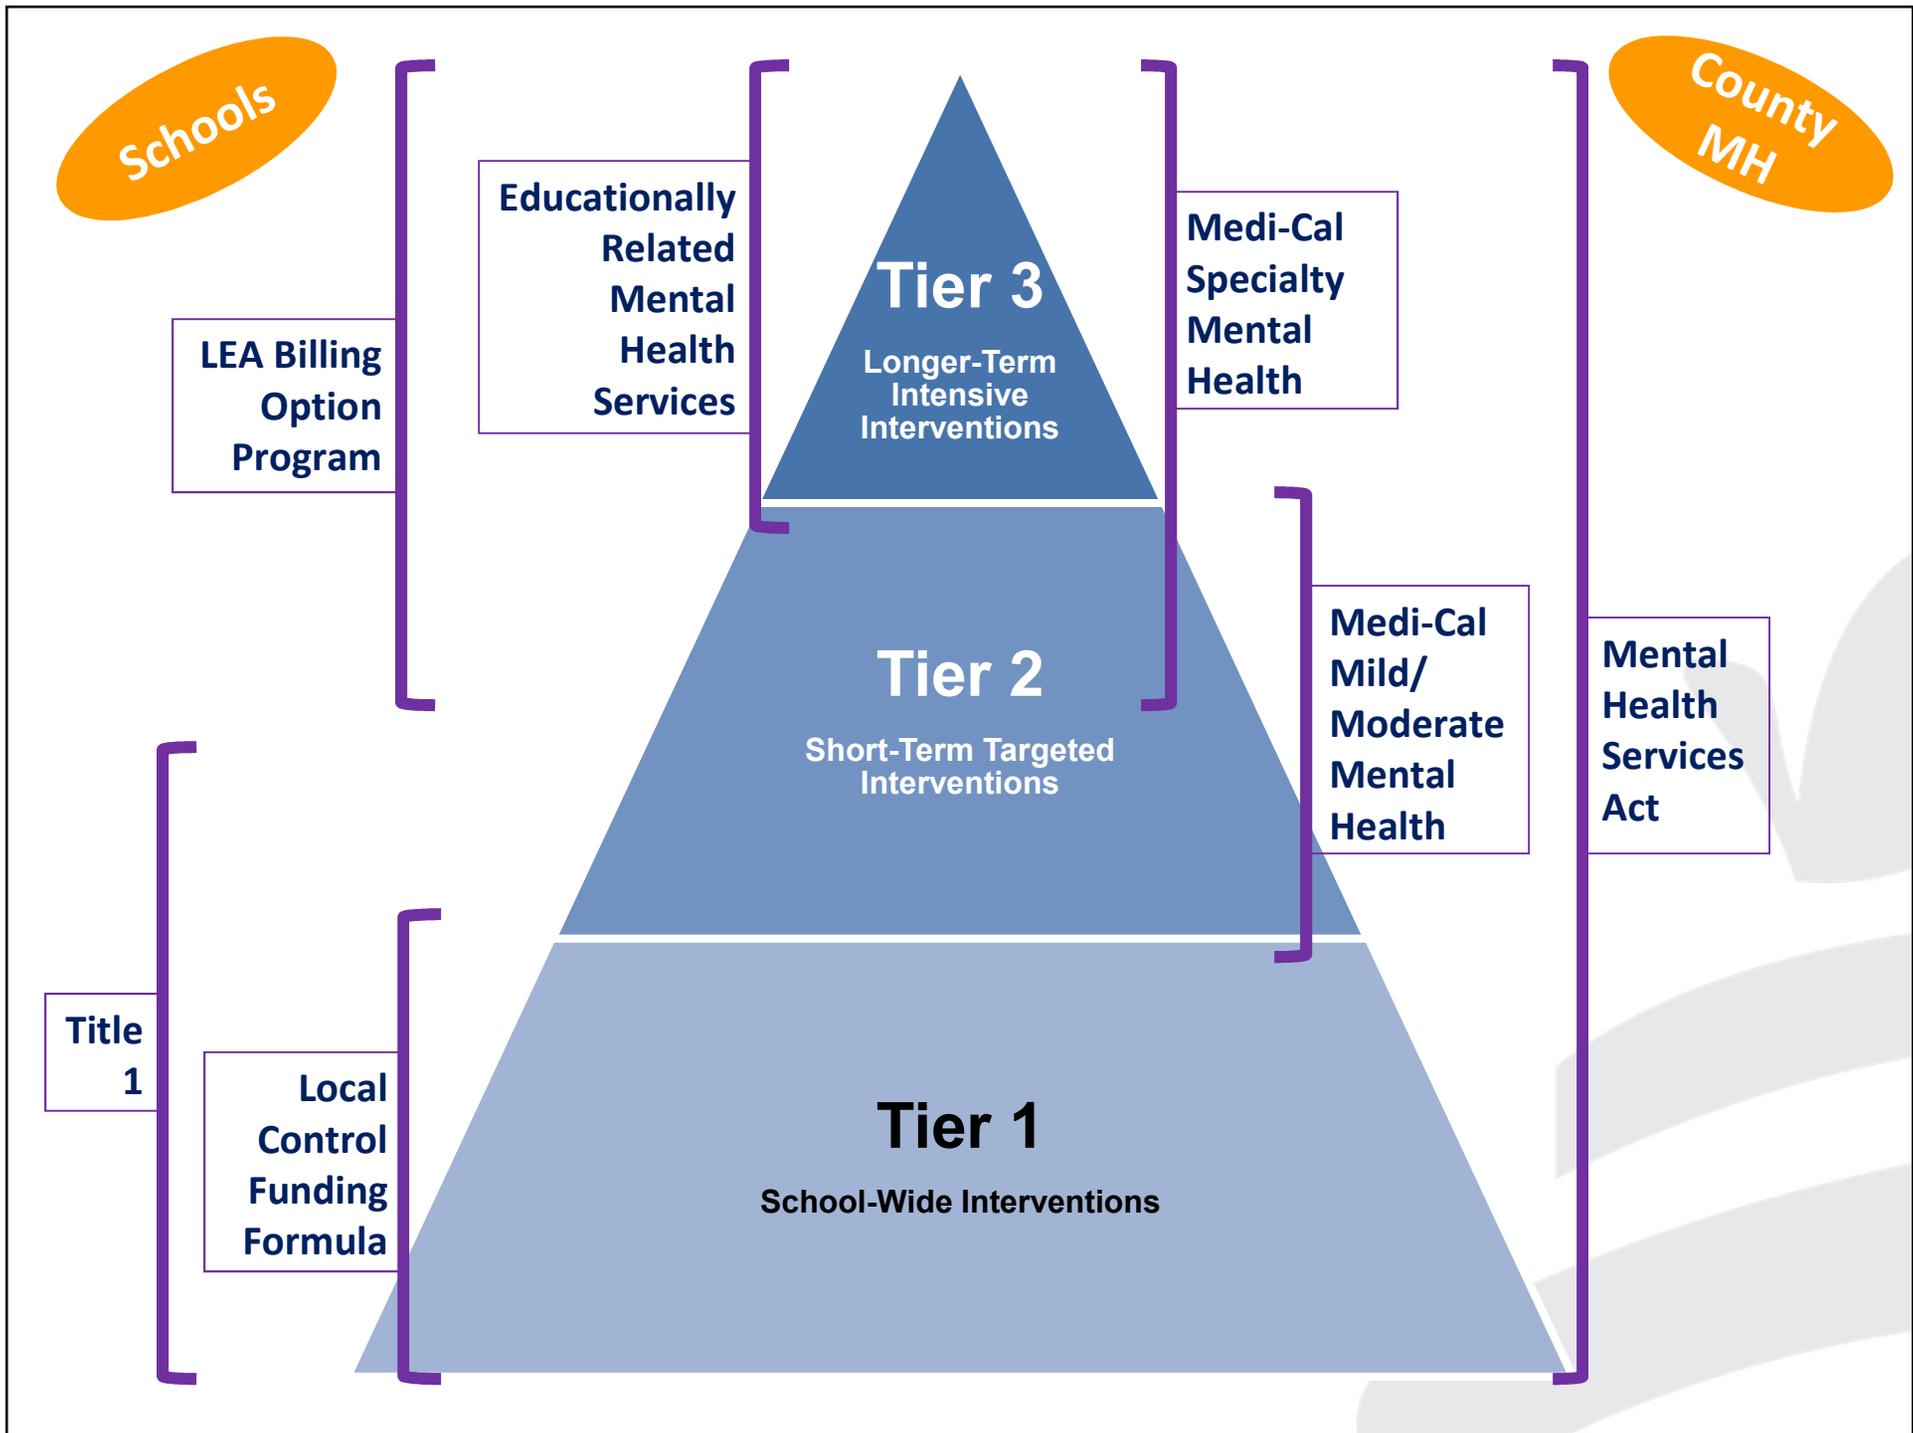

Overarching principles

- Schools shouldn't be creating mental health services on their own
 - There are considerable resources in the community & county to help
 - School mental health services meet the educational and health care needs of students
 - A student should not have to be in special education to receive mental health services in school settings
- 

Overarching principles

- Funding can be used for various school-based services; but there are strategic ways to use funding to support a comprehensive system
- The goal is to sustain services in all three tiers for a comprehensive school-based mental health

Medi-Cal

County Specialty Mental Health Services

County Mental Health Plans
(typically run by county departments of mental/behavioral health)

Medi-Cal youth w/ covered diagnosis and/or “services are necessary to correct or ameliorate a mental illness”

Must contract with the county – school staff, community-based organizations, SBHCs

Intensive, long-term clinical interventions

Mild/Moderate Mental Health Services

Medi-Cal Managed Care Plans

All Medi-Cal youth enrolled in a managed care plan

Must contract with the managed care plan – community-based mental health providers, SBHCs

Shorter term brief interventions

Mental Health Services Act (MHSA)

- Revenues from 1% income tax on millionaires; distributed directly to the counties
- MHSA-funded programs are intended to enhance, rather than replace, existing programs.
- 5 funding categories
 - Community Support Services
 - Prevention and Early Intervention
- County mental health programs must submit three-year plans and annual updates, with a listing of programs funded

Great for schools!

Mental health matters.
Together we can make a difference.

Schools

County MH

Educationally Related Mental Health Services

Medi-Cal Specialty Mental Health

LEA Billing Option Program

Tier 3

Longer-Term Intensive Interventions

Tier 2

Short-Term Targeted Interventions

Medi-Cal Mild/Moderate Mental Health

Mental Health Services Act

Title 1

Local Control Funding Formula

Tier 1

School-Wide Interventions

School Funding

ERMHS

Educationally related mental health services

State and federal restricted funds to SELPAs

Special education students

Mental health services identified in a student's IEP

LEA Billing Option

Local Education Agency Billing Option Program

Reimbursement program for schools

Medi-Cal eligible students

Covered services include psychology, counseling, and psychosocial assessments

School Funding cont.

LCFF

Local Control Funding Formula

Per student funding for public schools; districts must submit funding plans that demonstrate how funds will be used to support students

All K-12 students; targeted funding for low income, foster youth, or English-Language Learners.

LCFF funds almost every service provided by public schools; funds can be used to support school mental health infrastructure and services

ESSA

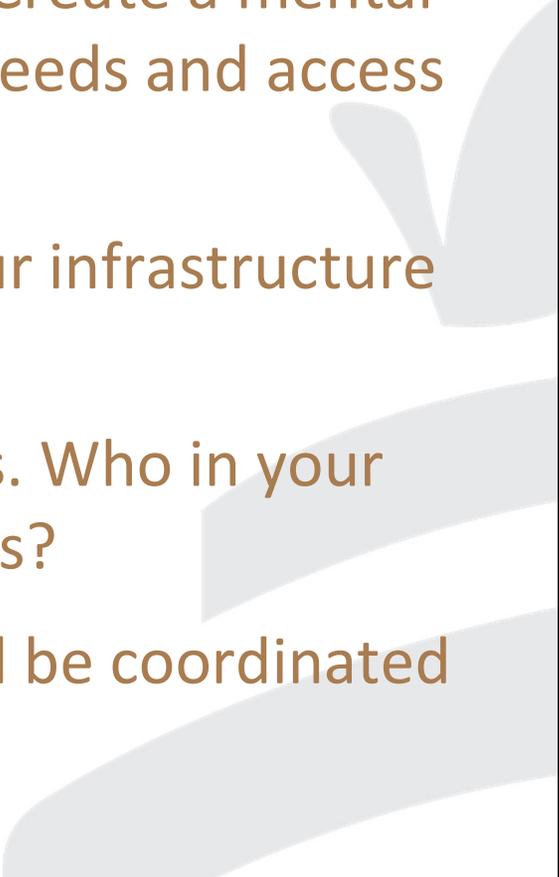

Every Student Succeeds Act

Title I – similar to NCLB
Title IV – consolidated 49 separate grant programs into flexible block grant

Schoolwide programs where 40% of students are low-income

Very flexible – counseling, school climate, bullying/violence prevention, training for staff

Strategies & next steps

1. Know your population of free and reduced lunch (similar to Medi-Cal).
 2. Assess your current services and gaps. Create a mental health profile that communicates the needs and access issues facing students
 3. School districts: commit to building your infrastructure as you reach out to potential partners.
 4. Identify potential partner organizations. Who in your community is also serving your students?
 5. Think through how outside services will be coordinated with district services.
- 

Making the case to partners: Why provide mental health services in schools?

Most children and youth who receive services get them at school

Individual and group counseling in schools are linked to more developmental assets for students

School-based services increase access and reduce stigma

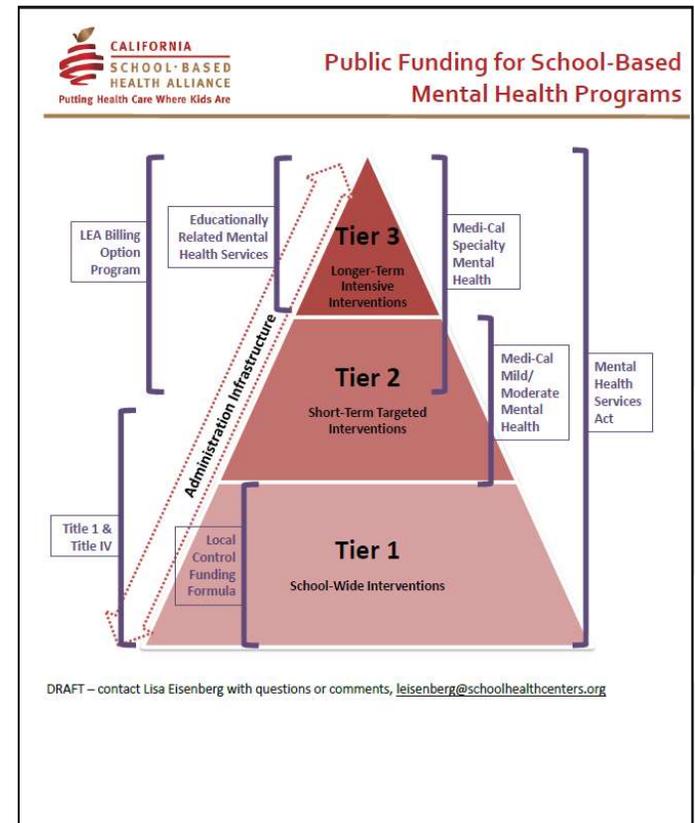

Improvement in mental health links to improvement in behavior, learning, and social skills
