- Health Education Efforts

James Potter School-Based Health Center

Our Lessons Learned

What it takes for an FQHC to open on a School Campus

- **Create Buy-In Immediately**
- **Patience Is Needed**
- **Transparent Conversations**
- **Be Ready for Delays**
- **Financial Sustainability is Important**
- **Don't Forget to Market**
- **Have a Plan!**

Impact Story

8th Grade Patient @ Potter Jr. High SBHC

"I sought therapy out for my daughter for her mental health issues from multiple different outlets, which would always cost me a lot of money, money which I did not always have."

"I felt that I was running out of options for myself and my daughter. It was putting a strain on the family dynamic and causing a separation between my daughter's step-father and herself."

"It was only until I had found out that my daughter would be able to attend counseling in school that I felt a sense of relief. I did not know what to expect in terms of price, but they have worked with my family and was able to take our insurance which has been such a great relief."

"I am so happy that this school has made teen mental health a priority and I do hope that this does not leave this campus. It has benefited my family which I know can benefit others."
